

Consent to umbilical cord blood donation Public Cord Blood Bank

I consent to voluntarily donate my child's umbilical cord blood for storage in a public Cord Blood Bank (CBB). The blood stem cells from this cord blood can be used to treat a patient in Switzerland or abroad who needs a blood stem cell transplant.

In particular, I confirm the following points:

- I have read the **Information Sheet for Cord Blood Donation – Public Cord Blood Bank** and understood its contents. I have had the opportunity to ask questions and all my questions have been satisfactorily answered. I have had enough time in which to reach a decision
- I am aware that the requirements and obligations stated in the Information Sheet (e.g. donor eligibility and notification of any changes in my health) are mandatory and I duly agree thereto
- I have been informed about the tests needed (in particular for communicable infectious diseases such as HIV, hepatitis B, C and E, and syphilis) and I consent to a blood sample being taken for this purpose between 7 days before and 7 days after delivery
- I consent to an umbilical cord blood sample being taken for HLA typing
- I consent to a genetic test being performed on a sample from my child's cord blood, if needed before the umbilical cord blood is released to the transplant center, to confirm the presence or absence of haemoglobinopathy. I also consent to additional genetic testing being performed if required by the transplant center
- I have been advised of my right to access the test results
- I consent to notify the obstetric department of any relevant changes in my health that could affect my eligibility to donate. I undertake to inform the obstetric department immediately if I fall ill in the next few days or shortly after giving birth, or if a close contact or my child falls ill
- I also undertake to notify the CBB and/or obstetric department of any changes in health occurring later in my life or the life of my child that could affect the quality and safety of the stored cord blood unit (CBU) or that could potentially affect the recipient
- I consent to my and my child's pseudonymized data being entered into the Swiss Transfusion SRC Inc. database
- I have been informed that in the event of a transplant with the donated cord blood, some blood samples will be stored for long after the transplant in order to resolve any issues that may later arise concerning this specific transplant and that could be important for the recipient
- It has been explained to me that after a transplant the recipient will have genetic tests to monitor the growth of the transplanted blood stem cells or track the development of the original disease. In rare cases, these tests may yield results that could be relevant for my child or me. The CBB will inform me if it learns of such test results and/or is required to do so by law
- I consent to Swiss Transfusion SRC Inc. and its accredited laboratories using the sample material and HLA data to analyze population variability in HLA and the distribution of the various HLA combinations. My data will be anonymized when used for this purpose. Such studies involve no risks for me and my child
- I am aware that up until the birth of my child I am entitled to withdraw my consent to donate my child's umbilical cord blood
- I am providing my child's blood stem cells free of charge
- In voluntarily donating my child's umbilical cord blood, I agree to transfer ownership of the CBU donation to the Public CBB

PRIVACY POLICY

Your privacy is extremely important to us. In this privacy policy you will find all the data you consent to share in storing your child's umbilical cord blood. All collected data are recorded, stored and processed in accordance with the Swiss Federal Act on Data Protection (DSG) and EU General Data Protection Regulation (GDPR).

How data are collected:

On registration with Swiss Transfusion SRC Inc.'s Blood Stem Cell Donor Registry your pseudonymized data are entered into the Swiss Transfusion SRC Inc. database. They include the child's code, gender and date of birth, HLA typing data, and mother and child health data.

How data are protected and used:

Swiss Transfusion SRC Inc. is beholden to the Federal Office of Public Health (BAG) to maintain investment in data security and protection so that your data stay safe from loss, misuse or unauthorized amendment in accordance with the Swiss DSG and EU GDPR.

How data are shared:

Data are shared with third parties solely within the framework of the federal mandate to maintain a blood stem cell donor registry and to procure donors and CBUs for patients. In doing so, Swiss Transfusion SRC Inc. ensures that data are shared with these third parties in accordance with the Swiss Federal Act on Data Protection (DSG) and EU GDPR. Swiss Transfusion SRC Inc. will never sell or share your personal data for the marketing purposes of third parties.

How data are archived:

Swiss Transfusion SRC Inc. archives data in accordance with legal requirements.
